# SEA|MESTER *Group Travel*

## Custom Global Field Programs

*Semester, May, J-Term, Spring Options Available*

Join one of our training and research schooners for an incredible experiential education program you and your students won't soon forget. Gain real world, hands-on experience in the Caribbean or in other destinations around the globe. Bring your own curriculum or earn credit through the University of South Florida in our core marine

science classes. Outside of the academics, you and your students will be active crew onboard - helming, trimming the sails, and even helping cook the meals. You'll also earn life-long certifications that are recognized around the world in sailing and scuba diving.

DATES AVAILABLE  
Dec 10 - Jul 6

GROUP SIZE  
12-20 students (4 staff free)

COST  
\$2,370 and up

# CUSTOM VOYAGE HIGHLIGHTS

YOUR ADVENTURE STARTS HERE

## Life Aboard

The only thing that's typical about a day with Sea|mester is that it's going to be anything but typical! Throughout the journey you should expect each day to be unique and unrepeatable, holding opportunities to witness, experience and learn about the world, about others and about yourself. From the moment you step aboard, you'll quickly learn that there are no passengers on our vessels, only crew members.

The first part of any voyage is all about learning the ropes, and acclimatizing to an entirely new way of life. Shifting roles and duties aboard, academic class scheduling, meal prep and provisioning, setting and striking sails, scuba training, watch teams, emergency drills...

Days fly by, confidence grows and before you even realize it, you're ready to make passage for an entirely new destination and different set of adventures. Irrespective of the length of the voyage, the destinations you discover or the vessel that you call home, you and your team will take the helm of your own experience. You'll alternate roles each day from Skipper to Mate, Navigator to Bo's'n to Engineer to Chef, and to roles that simply support the success of others.

The responsibility is designed to present challenges, and with our staff as facilitators, overcoming them holds a very real possibility of having a profound impact on who you are, what you believe in and what you consider important in life.

## Academics and Beyond

In the Sea|mester environment, combining academics with the experience allows students to truly interact with their education. It brings the academics to life, adding relevancy and practical application to the material. Living and learning in our environment presents endless teachable moments and never-ending opportunities to learn.

While academics are an integral part of each voyage, Sea|mester is vastly different than learning in a traditional classroom setting. We tailor the voyage around cultivating an immersive and relevant experiential environment, one that is more conducive to in-depth learning and a better understanding of the coursework. As a small team of 16 or 24, this means more familiarity, more practice, and one-on-one support around the clock.
